## Instructions:

- 12 x 12" CS base
- Cut (1) 12 x 12" PP on the diagonal from top left corner to bottom right corner. Most trimmers won't be large enough so use a straight edge and a craft knife to make this cut
- Adhere this large PP triangle to your CS base
- Using multiple different PP pieces, cut 1 1/2" squares, then cut them in half on the diagonal to create (15) triangles
- Arrange them how you'd like and adhere fit together as shown
- PHOTOS: this layout will accommodate several sizes of pics. You can adhere them with or without CS mats (if matting cut CS 1/4" larger than the size of your photo) and can adhere raised, not raised or a mix of both !
- Title and Embellish as desired
